The Next'bedrooms doorstop is a very good concept/tool taking into consideration professional risks and the diseases that may result from it. Reducing significantly physical constraints of housekeepers, it is a step forward to anticipate professional risks related to this field.

Anne ANDRIEUX

The doorstop is really good and also adapted for other than hotel field like EPHAD, retirement homes, hospitals, follow up care and rehabilitation... anyway for medico-social part.

Séverine VALLEE

As part of a CSR, a sustainable development approach, hotels have with Next'bedrooms a simple and powerful tool to improve the daily life of hotelmaids.

This product will find its place in the range of tools available for housekeeping employees because it combines quality, productivity and improvement of the working conditions.

www.next-bedrooms.com

The solution to keep in maintenance sector : hotel, health, sea and river cruises ... **flexibility** and **well-being**

The **+**
technical

- A thin layer of **non-slip** material keeping the doorstop firmly to the floor.
- A thin layer of soft material on the top of the doorstop **to protect the door sills.**
- The possibility to **customize** the entirely doorstop **to your image and color.**

Functions and uniqueness of the product

At a time simply, ingenious, and practical, the Next'bedrooms doorstop keeps doors open for the professional and domestic environment

(hotel rooms, health care places, retirement homes and houses or apartments).

The main advantage about the doorstop is that it can be positioned at the door sill (with or without a door closer) and can be taken off without any effort to bend down, and whatever is the door height, standard or not.

The doorstop has received **the 2019 INPI innovation prize** (le prix de l'innovation INPI 2019) and won the International Lepine competition 2019 in its category.

Beneficials effects

You enhance your company and your image by improving working conditions of your employees. You participate in the prevention of musculoskeletal disorders and physical risks so thus contribute to respect the rules on health and safety at work. You keep preserving the durability of bath linen.
